

# Leather craft knife

# 聖 HIJIRI series

High speed steel

## Bothhanded knife

Flat 30mm

Bladeshape: Leather knives have left and right edges because the shape of the cutting edge is asymmetrical.

By making it symmetrical, anyone can use it regardless of their dominant hand.

Steel material: Uses the finest material for chisel, high-speed steel. It is also quite resistant to damage from the cutter mat, which is a burden on the cutting edge.

Handle material: Made of smoked oak, hard and heavy.

This is a must-have for professionals because of its sharpness and cutting edge sustainability.

Once you start using it, you can't go back!

[Blade material] High speed steel

[Blade length] 50mm

[Handle material] Smoked oak

[Handle length] 100mm

[Blade material] Cutlery steel

[Handle material] Zelkova

[Handle length] 110mm

## Band shape skiving knife

12mm

The horn-shaped parts at both ends of the blade double as a guide and guard. You can skive the edges of the leather with the same width.

Since the tip is bent, the handle does not easily hit the leather. Skive, which requires technique, is easy to have with this one.

[Blade material] Cutlery steel

[Blade length] 35mm

[Handle material] Cypress

[Handle length] 100mm

With leather case

Emphasis on sharpness. Even hard leather is cut off.

With Dice steel, it is strong and has a long-lasting sharpness.

The handle uses Sakura wood. Calf A woman with a strong entasis type is also easier to grip.

[Blade material] Dice steel

[Handle material] Cherry blossoms

[Handle length] 100mm
